SOCIAL WORK RESEARCH AND STATISTICS

(CBCS – 2023 onwards)

Time : 3 Hours

Maximum : 75 Marks

Part A

(10 × 2 = 20)

Answer **all** questions.

1. Define any two type of research.
2. Write a short not on Ethical issues in SWR.
3. Explain the concept of a research design.
4. Define variable?
5. Tabulation means.
6. What is coding?
7. Explain the concept of frequency distribution.
8. Define measures of dispersion.
9. Give expansion for SPSS.
10. What is data view?

Part B

(5 × 5 = 25)

Answer **all** questions choosing either (a) or (b).

11. (a) Explain the concept and objectives of social work research.

Or

- (b) Differentiate between pure Research and applied research.

12. (a) Describe the concept of cause-effect relationships.

Or

- (b) Bring out the significance of identifying a research problem in social work research.

13. (a) Analyse the characteristics of a good sampling technique in social research?

Or

- (b) What is the purpose of a pre-test in research and how differ from a pilot study?

14. (a) Describe the limitations of using statistics in social work research.

Or

- (b) What are the steps involved in constructing a frequency table?

15. (a) Explain how to generate descriptive statistics in SPSS.

Or

- (b) Analyze the role of coding in data analysis using computer applications.

Part C

(3 × 10 = 30)

Answer any **three** questions.

16. Identify the major ethical issues in Social work research. How can researcher ensure ethical compliance during their studies?
17. Differentiate between dependent and independent variables with examples relevant to social work studies.
18. Evaluate the difference between probability and non-Probability sampling. Provide examples of each.
19. What is correlation? Discuss the importance of correlation analysis in social work research.
