Part B

(5 × 5 = 25)

Answer **all** questions.

11. (a) What are the scope and limitations of a research?

Or

- (b) Explain scientific method, its aim and objectives.

12. (a) Define hypothesis, its types and conditions.

Or

- (b) Brief about the experimental design.

13. (a) What are the factors that affect the sample size?

Or

- (b) Write about the tools for data collection.

14. (a) How can a data be presented in different ways?

Or

- (b) What is statistics? What are its uses?

15. (a) Write about the analysis and interpretation of data.

Or

- (b) What is the role of computers in research?

Part C

(3 × 10 = 30)

Answer **all** questions.

16. (a) Explain in detail about the steps involved in a research process.

Or

- (b) Explain parametric and non-parametric tests in detail.

17. (a) What is a research design and write the different types of research design?

Or

- (b) Explain the different methods of data collection.

18. (a) What is the need for report writing? Give its importance and types.

Or

- (b) Explain the different types of sampling methods in detail.
-
