It widens their horizon and gives them an edge over others in social and professional settings. Another advantage of reading is that it exposes readers to good style and rich vocabulary, which have a positive impact on communicative competence. For an alert reader, it is a natural way of assimilating language use and usage.

Up to the time of the illness that took away my sight and hearing, I lived with my father and mother in a tiny house. It had one large square room and another smaller one in which the servant slept. The house was completely covered with roses and other climbing plants, the favourite home of birds and bees. The beginning of my life was simple and much the same as every other little life. I came, I saw, I conquered, as the first baby in the family always does. There was the usual amount of talk about a name for me. At last my mother's advice was accepted and I was called Helen. These happy days did not last long. One short spring, musical with the song of birds, one summer rich in fruit and roses, one autumn of red and gold passed by and lift their gifts at the feet of an eager and delighted child. Then in the gloomy month of February 1882, came the illness which closed my eyes and ears and I Sank into a state of unconsciousness. The doctor thought that I could not live, but early one morning I became conscious again. My family celebrated that morning, but no one, Not even the doctor, knew that I would never see or hear again. Then she came - my teacher, Ann Sullivan - and she set my spirit free.
