M.Sc. DEGREE EXAMINATION, APRIL - 2023

Second Semester

Computer Science

MACHINE LEARNING

(CBCS - 2022 onwards)

Time: 3 Hours Maximum: 75 Marks

Part A $(10 \times 1 = 10)$

Answer all the questions.

- 1. Machine learning is a subset of which of the following.
 - (a) Artificial intelligence
 - (b) Deep learning
 - (c) Data learning
 - (d) None of the above
- 2. Which of the following is not a supervised learning?
 - (a) PCA
- (b) Naive Bayesian
- (c) Linear Regression (d) Decision Tree Answer
- 3. What does K stand for in K-means algorithm?
 - (a) Number of clusters
 - (b) Number of data
 - (c) Number of attributes
 - (d) Number of iterations

	(b) (c)	Can be computat		-	ain			
	(c) (d)	Less appropriate			na with many			
	(u)	Prone to errors in classification problems with many class						
7.	Arti	ficial Neural Netw	vork is	based on which	approach?			
	(a)	Weak Artificial I	Intellig	gence approach				
	(b)	Cognitive Artific	ial Int	elligence approa	ch			
	(c)	Strong Artificial	Intelli	igence approach				
	(d)	Applied Artificia	l Intel	ligence approach	L			
8.		ose the general li among the followi		ions of the back	propagation			
	(a)	Slow convergence	e					
	(b)	Scaling						
	(c)	Local minima pr	oblem					

Where does the Bayes rule can be used?

4.

10.		t is the most significant phase in a genetic
	(a)	Selection (b) Mutation
	(c)	Crossover (d) Fitness function
		Part B $(5 \times 5 = 25)$
	Ar	nswer all questions, choosing either (a) or (b).
11.	(a)	Elucidate about decision tree learning.
		Or
	(b)	Discuss about Heuristic space search.
12.	(a)	Explain about Gibbs algorithm.
		Or
	(b)	Elaborate the derivation of K-Means algorithm.
13.	(a)	Describe about avoid over fitting the data in the decision tree.
		Or
	(b)	Illustrate about instance based learning.
14.	(a)	Explain about Biological motivation in ANN.
		Or
	(b)	Illustrate about derivation of Back propagation Rule.
		3 R8448

Which approach is most suited to complex problems with

significant uncertainty, a need for experimentation, and

Human intuition (d) Genetic Algorithms

(b) Optimization

9.

(a)

(c)

time compression?

Simulation

15. (a) Enumerate about Hypothesis space search.

Or

(b) Write note on popular evolution and the schema theorem.

Part C $(5 \times 8 = 40)$

Answer any **five** questions.

- 16. Elaborate the types of ML and discuss the components in the design of a learning system
- 17. Describe the version spaces and candidate elimination algorithm.
- 18. Enumerate the interface in Bayesian network with example.
- 19. Construct a decision tree for the expression A = X AND Y OR Z.
- 20. Write note on multilayer networks.
- 21. Draw the model and explain the algorithm for Back propagation Drive necessary equations to depict the Back propagation error.
- 22. Explain about Genetic Programming with suitable example.
- 23. Illustrate about sequential covering algorithm.

R8448

551202

M.Sc. DEGREE EXAMINATION, APRIL - 2023

Second Semester

Computer Science

COMPILER DESIGN

(CBCS - 2022 onwards)

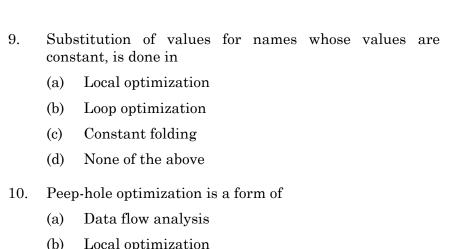

Time: 3 Hours Maximum: 75 Marks

Part A $(10 \times 1 = 10)$

Answer all the questions.

- 1. What is the output of lexical analyzer?
 - (a) A set of RE
- (b) Syntax Tree
- (c) Set of Tokens
- (d) String Character
- 2. Which of the following grammar can be translated into DFAs?
 - (a) Generic Grammar
 - (b) Left Linear Grammar
 - (c) Right Liner Grammar
 - (d) All of the above
- 3. Which parser is known as the shift-reduce parser?
 - (a) Bottom-up parser
 - (b) Top-down parser
 - (c) Both Top-down and bottom-up
 - (d) None of the above

4.	Whic	ch of the following parser is a top-down parser?
	(a)	An LALR parser
	(b)	A LR parser
	(c)	Operator precedence parser
	(d)	Recursive descent parser
5.		ch of the following error is expected to recognize by antic analyzer?
	(a)	Type mismatch
	(b)	Undeclared variable
	(c)	Reserved identifier misuse
	(d)	All of the above
6.		ch attributes get values from the attribute values of child nodes?
	(a)	Synthesized attributes
	(b)	Inherited attributes
	(c)	S-attributed SDT
	(d)	L-attributed SDT
7.	-	mization can be categorized broadly types.
	(a)	2 (b) 3
	(c)	4 (d) 5
8.		agment of code that resides in the loop and computes ame value at each iteration is called a?
	(a)	Induction analysis
	(b)	Strength reduction
	(c)	loop-invariant code
	(d)	none of the above
		2 R8449

- (b) Local optimization
- (c) Loop optimization
- (d) Constant folding

Part B
$$(5 \times 5 = 25)$$

Answer all the questions, choosing either (a) or (b).

11. (a) Explain about the importance of symbol table.

Or

- Differentiate NFA and DFA. (b)
- 12. Construct pars tree for the input string W = cad (a) using top-down parser.

$$S \rightarrow cAd \ A \rightarrow ab \mid a$$
.

Or

- Enumerate the limitations of syntax analyzer. (b)
- 13. (a) Illustrate about S-attributed definition with example.

Or

Write a note on stack allocation of space. (b)

R8449

14. (a) Explain about control flow.

Or

- (b) Discuss about type checking with necessary diagram.
- 15. (a) Illustrate about loop optimizations.

Or

(b) Describe about optimization of basic blocks.

Part C

 $(5 \times 8 = 40)$

Answer any **five** questions.

- 16. Explain the various phases of compiler with diagram and example.
- 17. Draw NFA for the regular expression ab^*-c+b^*-c .
- 18. Write the algorithm for minimizing the stages of a DFA.
- 19. Elucidate shift reducing algorithm with example.
- 20. Discuss about runtime storage management.
- 21. Describe about back patching.
- 22. Illustrate about the issues in code generation with example.
- 23. Enumerate about Peephole optimization.

R8449

4

M.Sc. DEGREE EXAMINATION, APRIL - 2023

Second Semester

Computer Science

FUNCTIONAL PROGRAMMING USING PYTHON

(CBCS - 2022 onwards)

Time: 3 Hours Maximum: 75 Marks

Part A $(10 \times 1 = 10)$

Answer all the questions.

- 1. Which of the following functions can help us to find the version of python?
 - (a) sys.version(1)
 - (b) sys.version(0)
 - (c) sys.version()
 - (d) sys.version
- 2. Who developed Python Programming Language?
 - (a) Wick van Rossum
 - (b) Rasmus Lerdorf
 - (c) Guido van Rossum
 - (d) Niene Stom

- 3. What is the order of precedence in python?
 - (a) Exponential, Parentheses, Multiplication, Division, Addition, Subtraction
 - (b) Exponential, Parentheses, Division, Multiplication, Addition, Subtraction
 - (c) Parentheses, Exponential, Multiplication, Division, Subtraction, Addition
 - (d) Parentheses, Exponential, Multiplication, Division, Addition, Subtraction
- 4. Is Python case sensitive when dealing with identifiers?
 - (a) No
 - (b) Yes
 - (c) Machine dependent
 - (d) None of the mentioned
- 5. What does pip stand for python?
 - (a) Unlimited length
 - (b) All private members must have leading and trailing underscores
 - (c) Preferred Installer Program
 - (d) None of the mentioned
- 6. Is Python code compiled or interpreted?
 - (a) Python code is both compiled and interpreted
 - (b) Python code is neither compiled nor interpreted
 - (c) Python code is only compiled
 - (d) Python code is only interpreted

12. With examples, explain 'lists that are mutable in (a) Python. Or (b) Discuss about mutable data types with examples. 13. (a) Why should we have inner functions in Python? (b) What is a closure? Explain.

14. (a) With examples. Explain Iterables in Python.

Or

- (b) Write a note on sequences.
- 15. (a) How will you define nested comprehension?

(b) Explain about closures in Python.

> Part C $(5 \times 8 = 40)$

Answer any **five** questions.

- 16. Discuss in detail the characteristics of functional programming.
- 17. Elaborate Aliases in Python in detail.
- 18. Describe about the problem with mutable objects in Python
- 19. Elucidate on recursion in Python in detail.
- 20. Bring out a detail study on creating anonymous functions in Python.
- 21. Explain in detail composing functions in Python.
- 22. Elaborate on iterators in Python with examples
- 23. Discuss Currying with examples in detail.

R8450

M.Sc. DEGREE EXAMINATION, APRIL - 2023

Second Semester

Computer Science

WIRELESS SENSOR NETWORKS

(CBCS - 2022 onwards)

Time: 3 Hours Maximum: 75 Marks

Part A $(10 \times 1 = 10)$

Answer all questions.

- 1. Which of the following is a collection of many separate networks?
 - (a) LAN
- (b) MAN
- (c) WAN
- (d) PAN
- 2. What is the term used to describe the ability for networking devices from different manufacturers to communicate effectively?
 - (a) Accessible
- (b) Interoperable
- (c) Portable
- (d) Scalable
- 3. The challenges we face in designing sensor network systems and applications include
 - (a) Limited hardware
 - (b) Limited support for networking
 - (c) Limited support for software development
 - (d) All of the above

4.	Wha man	t WLAN devi agement services to	ce wire	-	
	(a)	Access point	(b)	Antenna	
	(c)	Network adaptor	(d)	Repeater	
5.	decid		_	is not a consideration when and a wired LAN beyond the	
	(a)	Scalability	(b)	Ease of installation	
	(c)	Flexibility	(d)	RF Interferences	
6.		ch one of the follow less phones?	wing	frequency bands is used for	
	(a)	40 mhz	(b)	900 mhz	
	(c)	75 mhz	(d)	300 mhz	
7.		nsor network is de ——— environme	_	ed to collect information from	
	(a)	Logical			
	(b)	Physical			
	(c)	Logical as well as	Phys	ical	
	(d)	None of the above			
8.		ensor Network is d information proces	_	ned to perform a set of high tasks such as	
	(a)	detection	(b)	tracking	
	(c)	classification	(d)	All the above	
9.		are nodes the er to another.	nat ai	id in passing traffic from one	
	(a)	gateway	(b)	gradient	
	(c)	entry node	(d)	terminal node	
			2	R8451	

	(a)	time stamped	
	(b)	time sequenced	
	(c)	time stamped as well as time sequenced	l
	(d)	either time stamped or time sequenced	
		Part B	$(5 \times 5 = 25)$
	A	nswer all questions, choosing either (a) o	r (b).
11.	(a)	Write a note on infrared.	
		Or	
	(b)	Explain spread spectrum.	
12.	(a)	Write any five applications of WSNs.	
		Or	
	(b)	Define about 3G-MSC.	
13.	(a)	Describe about flooding in WSN.	
		Or	
	(b)	How will you explain SPIN?	
14.	(a)	Write a note on Mate.	
		Or	
	(b)	Provide the three components of SesOS	
15.	(a)	Discuss about Home Control application	n for WSN.
		Or	
	(b)	What do you mean by field sampling?	
		3	R8451

Each sensor in a sensor network takes —

sound, light, pressure or motion

measurements of physical phenomena such as heat,

10.

Part C $(5 \times 8 = 40)$

Answer any **five** questions.

- 16. With a neat diagram. explain in detail the IEEE802.11 system architecture.
- 17. Describe in detail the spectrum allocation for WiMAX.
- 18. In what way do MANETs and WSNs differ?
- 19. Write a detailed note on firewall.
- 20. Describe the routing challenges in wireless sensor networks.
- 21. Elucidate the data aggregation operations in detail.
- 22. Elaborate on the programming in TinyOS using NesC.
- 23. Bring out a detailed study on Nanoscopic Sensor Applications.

M.Sc. DEGREE EXAMINATION, APRIL – 2023

Second Semester

Computer Science

Elective II - CLOUD COMPUTING

		Elective II – C	LOUI	J COMI CIING			
		(CBCS –	2022	onwards)			
Time	e:3 H	lours		Maximum : 75 Marks			
		Pa	rt A	$(10 \times 1 = 10)$			
		Answer	all q	uestions.			
1.	Which of the following is a type of cloud computing service?						
	(a)	Service-as-a-Soft	ware (SaaS)			
	(b)	Software-and-a-Server (SaaS)					
	(c)	Software-as-a-Service (SaaS)					
	(d)	Software-as-a-Se	rver (S	SaaS)			
2.	on 1	the notion of co	mbini	of abstraction which is based ng physical resources and resources to users.			
	(a)	Real	(b)	Cloud			
	(c)	Virtual	(d)	None of the mentioned			
3.	Which one of the following cloud concepts is related to sharing and pooling the resources?						
	(a)	Polymorphism	(b)	Virtualization			
	(c)	Abstraction	(d)	None of the mentioned			

	of these, which ice model?	One is th	e most restrictive and refined
(a)	SaaS	(b)	IaaS
(c)	CaaS	(d)	PaaS
		creates	ce is a cloud computing a development environmen y be build.

10.	state	ch of the following Cloud Security Characteristic es that data not having been altered by an athorized party?
	(a)	Authenticity (b) Availability
	(c)	Confidentiality (d) Integrity
		Part B $(5 \times 5 = 25)$
	Aı	nswer all questions, choosing either (a) or (b).
11.	(a)	Discuss the characteristics and benefits of cloud computing.
		Or
	(b)	Summarize the challenges still open in Cloud computing.
12.	(a)	What are the characteristics in virtualization environment?
		Or
	(b)	Explain in detail about Storage services in Cloud computing.
13.	(a)	Briefly summarize cloud component model.
		Or
	(b)	Discuss about reliability and availability of design cloud environment.
		3 R8452

The characteristic of something having been provided by an authorized source in the context of security is known

Authenticity

Consistency

(b)

(d)

9.

as.

(a)

(c)

Integrity

Availability

14. (a) Briefly summarize about Google Cloud SQL.

Or

- (b) Write a brief note on packages in python.
- 15. (a) Write a brief note on Single Sign-on(SSO).

Or

(b) Discuss in detail about K-means clustering.

Part C

 $(5 \times 8 = 40)$

Answer any **five** questions.

- 16. Explain in detail about Cloud Computing reference model.
- 17. Elaborate the procedure to built cloud computing environment.
- 18. Explain in detail about the architecture of Hyper-V.
- 19. Describe in detail about community cloud.
- 20. Illustrate the architecture of service oriented cloud computing.
- 21. Illustrate the control structures used in python.
- 22. Write a detail note on python for windows Azure.
- 23. Explain in detail about Naive Bayes classification.
